ATTENTION: MS LORRAINE JOHNSON

Dear Madam,

RE: BIODEGRADABILITY DETERMINATION -
TRIPLE 7 COLLOIDAL CONCENTRATE

A sample marked "TRIPLE 7 Colloidal Concentrate (Ultmax, Envirolab, Envirobore)" was evaluated for its biodegradability in accordance with the procedures in AS4351 Part 2 "Determination by analysis of dissolved organic carbon (DOC)". This standard is technically equivalent to ISO 7827-1994 and is based on OECD "Ready Biodegradability" tests 301 and 301E.

The product was evaluated under the following test conditions.

Initial Organic Carbon Range	:	40.0 mg/L
Biodegradation and Toxicity Control	:	Sodium Benzoate
Microbial Inoculum	:	Mixed Activated Sludge and Secondary Effluent
Microbial Inoculum Level	:	0.05 mL/1000 mL
Incubation Temperature	:	20-25°C

The test was performed over a 21 day period with evaluations of dissolved carbon being performed at 0, 3, 7, 14 and 21 day intervals. Results presented incorporate calculations of blanks and are means of duplicate tests.

Results

Time (days)	Dissolved Organic Carbon (mg/L)			% Biodegradation
	Test 1	Test 2	Mean	
0	39.4	40.5	40.0	-
3	16.9	14.4	15.7	61%
7	5.9	5.6	5.8	86%
14	4.8	4.5	4.7	88%
21	4.9	4.9	4.9	88%

Our Ref: M07005107Z an
Replacement to M07005107

28	3.0	3.5	3.3	92%
----	-----	-----	-----	-----

The inhibition control displayed no inherent toxicity from the product under test.

Comment

The sample "TRIPLE 7 Colloidal Concentrate (Ultmax, Envirolab, Envirobore)" meets the requirement for ready biodegradability of a single organic substance or natural product when tested according to AS4351 Part 2.

Yours faithfully,

TREVOR LORMAN BSc(HONS), PhD, MRACI
NATIONAL CHEMISTRY MANAGER
